

Social Networking Philanthropy: Give Back, and Empower Your Customers with Online Giving Solutions

Want to stay ahead of the curve? Offer your customers and website visitors the opportunity to do more than purchase a service or product - foster an environment of philanthropy and community outreach.

Put your company front and center, and maintain peace of mind with the security and trust of Network for Good in the background.

With social networking solutions customized to match your company goals and e-philanthropy strategy, we can provide turn-key opportunities for donation processing and peer-to-peer fundraising in Web 2.0 functionality.

Create a Matching Grant Campaign

As with America's Giving Challenge (PARADE Magazine) and Six Degrees (with Kevin Bacon and Hanes, Inc.), your company can sponsor a matching grant campaign in which individual cause champions spread their cause to raise funds:

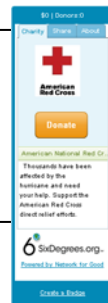

- Set a target number of donations.
- Give a deadline to encourage fast action.
- Foster friendly competition among wired fundraisers.
- Align your company with charitable giving and watch the philanthropic action happen!
- Network for Good handles customer service, donation disbursement, reporting and easy-to-use resources for your users.

Causes on Facebook, Fundraising Badges or Both!

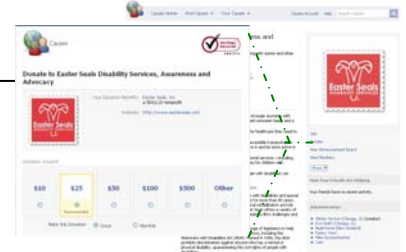

As the donation processor for two social networking services—Causes on Facebook and SixDegrees.org—Network for Good can support your campaign across one or two platforms:

- All 501c3 public charities are in our database; 1.2 million+ pre-vetted
- Donors can research organizations
- Safe, easy and convenient giving with credit card or PayPal
- Automated tax receipt
- Donation records stored for tax-time
